## Attention

- Before installation, the power should be turned off.
- Please use JAMMA standard (56P edge connector 3.96mm pitch) as an edge connector on circuit board.
- When you connect or disconnect a connector, cut off the power.
- When you switch a DIP switch and the STEREO / MONAURAL switch, cut off the power.
- Short-circuit of video output causes trouble.
- A radiator becomes very hot, DO NOT TOUCH.
- Set the circuit board to allow air ventilation around the radiator.
- Turning the volume quickly will cause noise, please turn slowly not to damage the speaker.
- Some parts of the circuit board becomes very hot, DO NOT TOUCH ANY OF THE PARTS, when handling the board.
- Please hold the edge when handling the circuit board, to avoid damage to the IC.
- Avoid shocks and do not get the circuit board wet.

## Contents

# Explanation of circuit board

- When you switch and DIP switch and the STEREO / MONAURAL switch(Please set to STEREO), cut off the power.
- All DIP switch should be OFF in normal usage. (When in the Test Mode, No.4 will be the only active DIP switch.)
- Turning the volume quickly will cause noise, Please turn slowly not to damage the speaker. Sound is an integral part of the game. Please set the speaker volume to a high setting.
